Photosynthesis Research **25**, 331–332, 1990.

Contents Volume 25 1990

CONTENTS Volume 25 No. 1 1990

Regular papers

Causgrove, T.P., Brune, D.C., Blankenship, R.E. and Olson, J.M.: Fluorescence lifetimes of dimers and higher oligomers of bacteriochlorophyll *c* from *Chlorobium limicola* 1

Malyan, A.N. and Vitseva, O.I.: pH dependent changes in ADP and ATP affinity for the tight nucleotide-binding site of chloroplast coupling factor 1 11

Desai, T.S.: Studies on thermoluminescence, delayed light emission and oxygen evolution from photosynthetic materials: UV effects 17

Olson, J.M. and Pedersen, J.P.: Bacteriochlorophyll *c* monomers, dimers, and higher aggregates in dichloromethane, chloroform, and carbon tetrachloride 25

Chylla, R.A. and Whitmarsh, J.: Light saturation response of inactive photosystem II reaction centers in spinach 39

Frederick, J.R., Alm, D.M., Hesketh, J.D. and Below, F.E.: Overcoming drought-induced decreases in soybean leaf photosynthesis by measuring with CO_2-enriched air 49

Wydrzynski, T., Baumgart, F., MacMillan, F. and Renger, G.: Is there a direct chloride cofactor requirement in the oxygen-evolving reactions of photosystem II? 59

Technical communication

Christensen, H.E.M., Conrad, L.S. and Ulstrup, J.: A new procedure for fast isolation and purification of plastocyanin from the cyanobacterium *Anabaena variabilis* 73

CONTENTS Volume 25 No. 2 1990

Personal perspective

Menke, W.: Retrospective of a botanist 77

Mini review

Foyer, C., Furbank, R., Harbinson, J. and Horton, P.: The mechanisms contributing to photosynthetic control of electron transport by carbon assimilation in leaves 83

Regular papers

Walker, G.H. and Edwards, G.E.: Inhibition of maize leaf phosphoenolpyruvate carboxylase by diethyl oxaloacetate 101

Henrysson, T. and Sundby, C.: Characterization of photosystem II in stroma thylakoid membranes 107

Carver, B.F. and Nevo, E.: Genetic diversity of photosynthetic characters in native populations of *Triticum dicoccoides* 119

Young, A. and Britton, G.: Photobleaching in the unicellular green alga *Dunaliella parva* 19/9 129

Letter to the editor

Wise, R.R., Terashima, I. and Ort, D.R.: The effect of chilling in the light on photophosphorylation 137

Rapid communication

Fotinou, C. and Ghanotakis, D.F.: A preparative method for the isolation of the 43 kDa, 47 kDa and the D_1–D_2-Cyt b_{559} species directly from thylakoid membranes 141

Kluwer Academic Publishers

CONTENTS Volume 25 No. 3 1990

Editorial note

van Kooten, O. and Snel, J.F.H.: The use of chlorophyll fluorescence nomenclature in plant stress physiology 147

Mini review

Govindjee: Photosystem II heterogeneity: the acceptor side 151

Regular papers

Bilger, W. and Schreiber, U.: Chlorophyll luminescence as an indicator of stress-induced damage to the photosynthetic apparatus. Effects of heat-stress in isolated chloroplasts 161

Bilger, W. and Björkman, O.: Role of the xanthophyll cycle in photoprotection elucidated by measurements of light-induced absorbance changes, fluorescence and photosynthesis in leaves of *Hedera canariensis* 173

Demmig-Adams, B. and Adams III, W.W.: The carotenoid zeaxanthin and 'high-energy-state quenching' of chlorophyll fluorescence 187

Rees, D., Noctor, G.D. and Horton, P.: The effect of high-energy-state excitation quenching on maximum and dark level chlorophyll fluorescence yield 199

Harbinson, J., Genty, B. and Baker, N.R.: The relationship between CO_2 assimilation and electron transport in leaves 213

Canaani, O.: Photoacoustic studies on the dependence of state transitions on grana stacking 225

van Wijk, K.J. and van Hasselt, P.R.: The quantum efficiency of photosystem II and its relation to non-photochemical quenching of chlorophyll fluorescence; the effect of measuring- and growth temperature 233

Schmidt, W., Neubauer, C., Kolbowski, J., Schreiber U. and Urbach W.: Comparison of effects of air pollutants (SO_2, O_3, NO_2) on intact leaves by measurements of chlorophyll fluorescence and P_{700} absorbance changes 241

Genty, B., Harbinson, J., Briantais, J.-M. and Baker, N.R.: The relationship between non-photochemical quenching of chlorophyll fluorescence and the rate of photosystem 2 photochemistry in leaves 249

Snel, J.F.H., Kooijman, M. and Vredenberg, W.J.: Correlation between chlorophyll fluorescence and photoacoustic signal transients in spinach leaves 259

Dau, H. and Hansen, U.-P.: A study on the energy-dependent quenching of chlorophyll fluorescence by means of photoacoustic measurements 269

O_2-dependent electron flow, membrane energization and the mechanism of non-photochemical quenching of chlorophyll fluorescence 279

Lichtenthaler, H.K., Hak, R. and Rinderle, U.: The chlorophyll fluorescence ratio F690/F730 in leaves of different chlorophyll content 295

Goulas, Y., Moya, I. and Schmuck, G.: Time-resolved spectroscopy of the blue fluorescence of spinach leaves 299

Technical communications

Kolbowski, J., Reising, H. and Schreiber, U.: Computer-controlled pulse modulation system for analysis of photoacoustic signals in the time domain 309

Klughammer, C., Kolbowski, J. and Schreiber, U.: LED array spectrophotometer for measurement of time resolved difference spectra in the 530–600 nm wavelength region 317

Announcement 329
